

REMARKS

This preliminary amendment is made to correct a typographical error.

The error occurring at Page 3, Line 12, change "3 and 4" to -- 4 and 5 --.

Respectfully submitted,

BRIEF DESCRIPTION OF THE DRAWINGS

The above and other objects, features and advantages of the present invention will become more apparent from the following detailed description taken with the accompanying drawings in which:

5 FIG. 1 is an exploded isometric view showing a cellular phone embodying the present invention;

FIG. 2 is a schematic block diagram showing electric circuitry included in the illustrative embodiment;

10 FIG. 3 is a schematic block diagram showing a specific configuration of a speech output switching controller included in the circuitry of FIG. 2; and

15 FIGS. 3 and 4 are flowcharts demonstrating a specific operation of the illustrative embodiment.

DESCRIPTION OF THE PREFERRED EMBODIMENT

Referring to FIG. 1 of the drawings, a cellular phone embodying the present invention is shown and includes a circuit board 3. A first and a second speaker 4 and 5, respectively, a microphone 6, an operation panel 7 and a display 8 are mounted on the circuit board

20 3. The first speaker 4 selectively outputs a received speech or sound including a call incoming tone and music. The second speaker 5 outputs only sound. The first and second speakers 4 and 5 are spaced from each other on one major surface of the circuit board 3 so as to implement a stereophonic effect. The speaker 4 is positioned such
25 that when the user of the phone converses on the phone, the speaker
